Terms and conditions

IMPORTANT NOTICE - TO BE READ IN CONJUNCTION WITH CONFIDENTIAL AAF 02/07 REPORT ON INTERNAL CONTROLS OF NEST

A report on the internal controls of NEST, prepared by NEST Corporation, to which is appended an assurance report on internal controls for the period 1 April 2017 to 31 March 2018, prepared by reporting accountants, KPMG LLP. Produced solely for NEST Corporation, the Reporting accountants’ report is available for viewing subject to the following terms. It has been prepared on a confidential basis, in accordance with terms of engagement agreed by NEST Corporation, with the reporting accountants.

The reporting accountants wish readers to be aware that their work for NEST Corporation was designed solely to meet their agreed requirements and was determined by their needs at the time.

The Reporting accountants’ report should not be regarded as suitable to be used or relied on by any reader, other than NEST Corporation, for any purpose or in any context. In consenting to the posting of their report on this website, the reporting accountants do not accept or assume any responsibility to any readers other than NEST Corporation in respect of their work for NEST Corporation, their report, or any opinions that the reporting accountants may have formed. To the fullest extent permitted by law, the reporting accountants will accept no liability in respect of any such matters to any readers other than the NEST Corporation. Should any readers other than the NEST Corporation choose to rely on the Reporting accountants’ report, they will do so at their own risk.
Introduction from the Chair

I’m pleased to present our fourth control assurance report on behalf of NEST Corporation, the Trustee of the National Employment Savings Trust (NEST) pension scheme (the scheme).

The first of these reports identified and mapped processes and procedures across the control objectives. This is our third type 2 report, examining the adequacy and operation of our processes and procedures for the governance and administration of the scheme over a period of time.

NEST was set up by the government especially for auto enrolment. We make sure that every employer has access to a workplace pension scheme that meets the requirements of the pension rules, but we do more than just meet the regulatory minimum. NEST is designed to make auto enrolment straightforward, whether you’re a member saving with NEST, an employer using the scheme for your workers, or a professional helping your employer clients.

At NEST we take governance extremely seriously. Auto enrolment has brought millions of people into workplace pension saving, many for the first time. It’s important that we do all that we can to build and safeguard confidence in pensions for this new generation of savers. Robust governance standards that are clearly implemented across the industry are one step towards this goal and the AAF 02/07 Master Trust assurance framework is one of the most comprehensive of these standards. Another of the standards, the Pensions Quality Mark (PQM) READY status, was achieved by NEST in January 2014 and is reviewed on an annual basis. This means that employers choosing us for their workers can be assured that they’re getting a scheme with good governance, low charges and clear member communications.

NEST was one of the first schemes to complete type 1 and type 2 AAF 02/07 report against the Master Trust assurance framework, developed by The Institute of Chartered Accountants in England and Wales (ICAEW) and The Pensions Regulator (TPR). These reports provided an independent assessment of the design and operation of our internal controls against the framework. They built upon the foundations set by the governance statement we published in 2014. These foundations assessed our governance arrangements against the defined contribution (DC) quality features identified by TPR in their Code of Practice for the Governance and Administration of Defined Contribution Trust Based Schemes. As we move into the era of a formally regulated Master Trust sector under the new Occupational Pension Schemes (Master Trusts) Regulations 2018, we expect that our continued focus on this area will stand us in good stead. This fourth AAF 02/07 report demonstrates the continued effectiveness of the design and operation of the internal control structure of the NEST scheme. Our reporting accountant, KPMG conducted this assessment of how we exercise our internal controls and this report confirms that all the control objectives set out in the AAF guidance were met for the reporting period.
It’s important for our employers and members to understand that this assurance report, as part of our governance assurance work, isn’t just a paper exercise for us. We’ve completed it thoroughly, transparently and in accordance with best practice. Because of our focus on our members’ interests, we’ve made sure this assurance report delivered value for money for our members.

We’ll build on the lessons learned from the output of this report to continue to develop our control framework, which is designed to deliver good member outcomes.

We hope that this will contribute towards building a safer and more secure pension saving landscape for the auto enrolment generation. We look forward to supporting our members in saving confidently for their retirement.

This report considers the control environment between 1 April 2017 and 31 March 2018. It’s been prepared in accordance with the Institute of Chartered Accountants in England and Wales (ICAEW) Master Trust supplement to AAF 02/07 standard.

We summarise the 27 control objectives from the Master Trust supplement in section 4. We then demonstrate the processes and controls that we use to meet these objectives in section 5. These processes and controls have been reviewed, and reported on, by KPMG LLP.

This report looks at the controls operated by NEST Corporation over the affairs of the master trust, and not the operational controls performed on our behalf by third parties, such as our scheme administrator, Tata Consulting Services (TCS).
As the Trustee of NEST, we're responsible for the identification of control objectives relating to governance and administration in the operation of NEST. We also oversee the design and implementation of the control procedures, to provide reasonable assurance that the control objectives are achieved. These objectives are derived from the defined contribution (DC) code of practice and DC regulatory guidance, and are set out in the ICAEW Technical Release: Assurance reporting on master trusts (Master Trust Supplement to ICAEW AAF 02/07).

In carrying out those responsibilities, we have regard not only to the interests of employers and members of NEST, but also to the needs of the trust business and the general effectiveness and efficiency of the relevant operations.

We have evaluated the effectiveness of NEST's control procedures, having regard to the ICAEW’s Technical Release AAF 02/07 and the criteria for master trusts set out therein.

We set out in this report a description of the relevant control procedures together with the related control objectives which operated over the period 1 April 2017 to 31 March 2018 and confirm that:

- The report fairly describes the control procedures that relate to the control objectives referred to above which were in place.
- The control procedures described were suitably designed and operated such that there is reasonable assurance that the specified control objectives would be achieved if the described control procedures were complied with satisfactorily.
- The control procedures described were operating with sufficient effectiveness to provide reasonable assurance that the related control objectives were achieved during the specified period.

The result of the review of these controls is set out in the reporting accountant’s report, forming section 6 of this document. In addition, we can confirm that the results of the detailed tests in the full version include three instances where the control had not operated in accordance with the approved process. Overall, the reporting accountant did not consider these testing exceptions to be of material significance or representative of a thematic gap in relation to the operational effectiveness of our controls. They were also satisfied with the management responses provided.

Otto Thoresen
Chair of NEST Corporation
29 June 2018
Controls assurance framework

Organisation overview

NEST is a trust-based occupational pension scheme, set up in 2010, to support the government’s pension reforms. Designed to make auto enrolment easier for employers and their workers, NEST offers easy online access, clear communications, high quality governance and an award-winning investment strategy.

NEST Corporation is the Trustee of NEST (hereinafter referred to as ‘the Trustee’), made up of nine to fifteen Trustee members, including the Chair of the Corporation. As Trustee, NEST Corporation has a duty to run the scheme in the best interests of its members. Currently, Trustee members are appointed by the Secretary of State for Work and Pensions in line with public appointments guidance that promotes selection on the basis of merit, fairness and openness. Under the Pensions Act 2008, the Trustee receives guidance from a Members’ Panel that represents the member’s perspective of the scheme, and an Employers’ Panel that represents participating employers. The panels are consulted on matters to do with the operation and development of the scheme. It also consults the panels when specifically required to by legislation, for example when making changes to the NEST rules.

Unlike any other occupational pension scheme trustee, NEST’s Trustee has a public service obligation (PSO) to accept any employer who wishes to use NEST to meet its employer duties. An employer just needs to agree to the terms and conditions of the scheme and use the scheme in line with these terms and conditions. Employer terms and conditions are reviewed at least once a year and as necessary following any changes to relevant legislation.

Members enrolled into the scheme have access to their own individual, secure online member account. Once logged in, they can review their personal details, make additional contributions, change their investment fund and cease contributions. A member can continue using NEST throughout their working life, regardless of any changes of employment or personal circumstances.

Since the staging process for auto enrolment began in October 2012, NEST Corporation has enrolled over 6.4 million members into the scheme from over 616,000 employers.

Restrictions

The Pensions Act 2008 placed certain restrictions on the NEST scheme, one of which was the annual contribution limit. This was reviewed each year and updated in line with the average earnings index, following a formula set out in the NEST rules. This limit was removed completely from 1 April 2017. There were also restrictions on transfers into and out of the scheme, which were also removed on the 1 April 2017.

Charges

There’s no charge from NEST for employers to set up or use the NEST scheme. There’s also no charge from NEST for delegates acting on behalf of an employer, for example a third party that the employer has asked to administer the scheme for them.

The scheme has the same charges for all members, no matter who their employer is, what their level of contributions is or which retirement fund they invest in. These charges are made up of two parts:

- a contribution charge of 1.8 per cent on each new contribution into a member’s retirement fund
- an annual management charge (AMC) of 0.3 per cent on the total value of a member’s fund each year, which is reflected in the unit price.
NEST doesn’t charge members for transfers in to or out of the scheme. The 0.3% AMC applies to funds transferred in and is reflected in the unit price but there is no contribution charge applied to such amounts.

Every year, the Trustee also produces a value for members report. This brings together information from investment reports and market data to assess the quality of service provided against the costs and charges applied to the membership.

NEST Corporation’s operating model

NEST Corporation operates an outsourced business model. As a Non-Departmental Public Body operating at arm’s length from the government, NEST Corporation is subject to the Public Contracts Regulations 2015 and as such it operates robust procurement processes.

NEST Corporation has outsourced many of the key services in relation to running the scheme. This report focuses on the controls operated by NEST Corporation over the affairs of NEST, including monitoring the operational controls performed by third parties. These operational controls aren’t included in this report because they’re the responsibility of the third party service providers and are included in their own internal controls reports. The main operations outsourced to the third party service provider by NEST include, but aren’t limited to the following operations.

- **Scheme administration**: Tata Consultancy Services (TCS)
  - Includes setting up new employers, maintenance of member records, processing contributions and paying member benefits.

- **Fund administration**: State Street Bank (SSB or Fund Administrator)
  - The set of activities supporting the running of the retirement funds we offer members. It includes directing the right contributions to the right fund managers and working out the unit prices of the scheme’s funds.

- **Fund management**
  - Managing the investments used by NEST Corporation as building blocks to make up the investment funds we offer members:
    - Global developed equities **UBS Asset Management**
    - Climate aware global developed equities **UBS Asset Management**
    - Global high yield bonds **J.P. Morgan Asset Management**
    - Global listed property **Legal & General Investment Management**
    - Low-risk sterling equity **BlackRock**
    - Ultra-short duration investment grade bonds **BlackRock**
    - Sterling corporate bonds **Royal London Asset Management**
    - Short duration investment grade bonds **Royal London Asset Management**
    - Gilts **Legal & General Investment Management**
    - Index-linked gilts **State Street Global Advisors**
    - Global emerging market equities (ESG screened) **Northern Trust Global Investments**
    - Global emerging market equities (economic weighting) **HSBC Global Asset Management**
    - Sharia compliant equities **HSBC Global Asset Management**
    - Ethical global equities **BMO Global Asset Management**
    - Ethical sterling corporate bonds **BMO Global Asset Management**
    - UK direct property **Legal & General Investment Management**
    - Emerging market debt **Amundi Asset Management**
    - Low-risk sterling liquidity **Amundi Asset Management**
    - Equity risk hedging **Amundi Asset Management**
### Market recognition

NEST has been awarded a 5 Star rating in the auto enrolment pension category from the leading independent financial research company, Defaqto. Their ratings are designed to show the level and quality of features and benefits in a financial product to help people make better financial decisions. The 5 Star rating indicates that NEST provides a high quality offering in the auto enrolment market.

NEST has also received awards for the development of innovations, such as NEST Connect and NEST web services, our approach to communications, and investment strategy. These awards include DC investment provider award at PIPA awards 2018 and DC Scheme of the Year at the Institutional Investor Institute Peer-to-Peer UK & Ireland awards 2017. Other awards NEST has recently obtained include the 2017 Innovation Award at the Pensions and Investments at World Pensions Summit, Master Trust offering of the year at the Pensions Age Awards 2017, and best master trust at the Corporate Adviser Awards 2016.

### Organisational structure

NEST Corporation is sponsored by the Department for Work and Pensions (DWP). Although it’s accountable to Parliament through the DWP, it acts at arm's length from government and is largely independent in its day-to-day operations.

NEST Corporation’s powers are defined by four authorities:
- the Pensions Act 2008 sets out its functions and powers as a corporate body
- the scheme order sets out its powers as a Trustee
- trust and pensions legislation
- common law.

There’s also a set of scheme rules that outline further Trustee powers and duties.

When taking a decision, NEST Corporation must be clear that it has the power to do so and reference the source of that power.

**The Trustee**

NEST Trustee Committee comprises of nine to fifteen Trustee members, including the Chair of the Corporation. The Trustee meets regularly throughout the year to agree strategy, monitor performance, explore issues relevant to the governance and administration of the scheme and make decisions. Dates for the meetings are agreed up to a year in advance and follow a formal agenda. Each year, the Trustee carries out a board effectiveness review for the Trustee board as a whole, and also for each of its committees. At least every three years, the Trustee effectiveness review is carried out by an external facilitator, in line with best practice.

Newly appointed Trustee members are expected to complete The Pension Regulator's Trustee members toolkit. They’re also encouraged to review and identify any gaps in their knowledge and understanding at least once a year. This aims to help address any training needs and keep Trustees up to date with issues regarding the scheme’s operations and the legislative environment in which it operates. Trustee members also complete a number of internal training programmes.

Trustee members identify, monitor and manage conflicts of interest in accordance with the conflicts of interest policy and the statutory provisions. This policy is reviewed each year.

**Delegation of authority**

The Trustee reserves some matters for its decision and delegates some matters to its committees for decisions to be made. Other decisions are automatically within the authority of the Chief Executive Officer (CEO), which allows effective decision making to support the day-to-day operations of NEST Corporation and Scheme. A Scheme of Reserved Matters and Delegations outlines who has the authority to make decisions and is reviewed by the Trustee each year.

**Delegation to committees**

A number of committees have been established, each chaired by a Trustee Member and attended by representatives from the executive team. A committee meeting can’t take place unless an agreed minimum quorum of Trustee members is present.

Each committee has its own terms of reference to outline its responsibilities. It also requires each committee to report back to the Trustee on the areas for which it’s responsible.
The responsibilities of each committee are:

- **Audit committee** — determining the integrity of the financial statements for NEST Corporation and the scheme, approving and monitoring the internal control framework and the effectiveness of audit and compliance functions.

- **Risk committee** — advising on overall risk strategy and considering all aspects of risk, and the management of those risks, that could affect NEST Corporation and the scheme.

- **Investment committee** — the overall investment strategy and any changes to the investment approach or the funds made available to members. Also monitoring investment performance and operational investment risks.

- **Nominations and Remuneration committee** — leading the recruitment for the appointment of the CEO of NEST Corporation, supporting and assisting with recruitment of Trustee members by the Secretary of State, recruitment for Panel members, ensuring sound corporate governance within NEST Corporation, setting the remuneration of the CEO, providing advice on setting the remuneration of other employees of NEST Corporation and overseeing NEST Corporation’s organisational culture and values.

- **Determinations committee** — decision-making on disputes received about the scheme at Stage 2 of the internal dispute resolution procedure (IDRP). The committee makes recommendations to the executive on learning outcomes from the Stage 2 IDRP disputes, to help improve the effectiveness of the scheme and member experience.
Delegation to the chief executive officer (CEO)

Decisions which are not reserved to the Trustee or a Committee of the Trustee are within the authority of the CEO. The CEO is supported in exercising these powers by eight accountable executives who assist with the delivery of the delegated functions. Although many powers are delegated, the Trustee remains ultimately responsible for the operations of NEST Corporation and the scheme.

To help ensure that delegated powers are being properly exercised, the Trustee receives feedback and assurance from the CEO and the other accountable executives. This is done both directly and through its committees.
NEST people and culture

NEST Corporation recognises that its greatest asset is the people who work in the organisation. Recruitment and retention of staff and the working environment are therefore key areas of focus for the Trustee and executive team alike.

Recruitment into NEST Corporation follows a thorough employee vetting process. This is designed to ensure that the candidate displays the competence to successfully undertake a role and subscribes to NEST Corporation’s mission and values. New employees are briefed on the operation of NEST Corporation through an induction process that includes training on what’s expected of them while working in a regulated environment.

The working environment within NEST Corporation is based on a culture established in accordance with a set of ethical principles. These are explained in a NEST Corporation Code of Conduct given to all members of staff and backed up with specific policies addressing areas like:

- equality, diversity and dignity at work
- gifts and hospitality
- conflicts of interest
- conducting political activities
- competition law
- procurement
- travel and expenses
- data protection
- information security
- staff share dealing policy
- anti-bribery and corruption.

Each year, the accountable executive will seek confirmation that their team has read and understood the NEST Corporation Code of Conduct.

NEST Corporation recognises that it has a responsibility to foster a culture in which acting with integrity is the norm and all staff can act in an open and honest manner. This is supported by a comprehensive system of internal communication and briefing through NEST Corporation’s intranet site, including a weekly blog by the chief executive, which summarises some of the current NEST Corporation’s news and key outcomes from governance meetings.

NEST Corporation recognises that its staff need to be well supported by management to prepare for future career development. NEST Corporation has a learning and development budget for this. The budget is used to address identified training needs and to help staff develop skills, to enable them to further their careers. Ongoing assessment of competence and performance is assured by a formal annual appraisal process for staff at all levels.

Risk management framework

NEST Corporation has an enterprise risk function that’s responsible for establishing and embedding NEST’s risk management framework. The framework is designed to help all parts of the organisation identify, assess, manage and monitor significant risks that exist within their environment. This includes operational, financial, regulatory and compliance risks. The risk management framework is approved by the Trustee and reviewed annually to ensure it accurately reflects NEST Corporation’s risk management objectives.

Principal Risks

A Principal Risk is defined as ‘a risk that is considered material to the development, performance, position or future prospects of NEST’. This definition is based on language used by the Financial Reporting Council. If our principal risks crystallise, they may prevent us from achieving NEST’s strategic priorities.

On a triennial basis, the principal risks will undergo a comprehensive zero-based review with the Trustee members and executive team. On an annual basis, there’ll be a review led by the Executive Team, to ensure the risks remain fresh and current. The Trustee will approve the principal risks following both the triennial and annual reviews. Substantial changes, such as opening or closing a principal risk, are taken to the Risk Committee for approval, with the recommendation of the chief risk officer.
Risk registers

Across the organisation, each executive director must maintain a risk register and nominate a risk coordinator. The coordinator will liaise with the enterprise risk function directorate to ensure that risks are identified, included in the risk register and the risk register remains accurate.

Once a risk has been identified, it’s assessed for impact and likelihood on a scale of 1 to 5. The risk scoring matrix is made up of descriptive examples to ensure risks are rated consistently across the organisation. All risks have a named owner who’s responsible for accurately describing and rating the risk. All risks on a risk register are reviewed on an ongoing basis for continued relevance and to ensure that the risk ratings remain accurate. They’re also reviewed to take account of any additional mitigating activities that have taken place or are planned. Commitment to risk management processes at a senior level is high. NEST’s executive board are presented with a risk dashboard every quarter that highlights key risks from across the organisation and outlines any key changes and areas of particular interest. The dashboard is used to initiate conversations about risk, helping to raise awareness and drive mitigation activities.

The risk committee

The risk committee is chaired and attended by Trustee members and meets on average five times a year. The committee provides independent oversight of the risk management framework and challenges the control strategies surrounding key risks. They undertake in-depth reviews and scenario analyses of specific areas of risk as a method of gaining assurance that risks are being managed effectively.

The committee also receives a copy of the risk dashboard to ensure they have oversight of the highest rated risks across NEST Corporation and NEST the Scheme, as well as monitoring the Principal Risks as identified by NEST Corporation.

Operating an outsourced model

By operating an outsourced model, NEST Corporation is able to obtain and effectively scale services from third party suppliers. NEST Corporation’s approach to its outsourcing model is designed to provide effective internal controls for investment and fund administration, scheme administration and IT.

A vital mechanism of the outsourced model is how NEST Corporation appoints, monitors and manages key service providers and suppliers to assist in delivering a quality pension scheme. NEST Corporation’s purchasing policy provides the framework for how it undertakes procurement of these key service providers and suppliers. The purchasing policy is aligned to the Public Contracts Regulations 2015 legislation. On the basis stipulated by the contractual agreement, the performance of key service providers and suppliers is assessed by the relevant business area.

Business continuity and disaster recovery plans, as well as associated policies are in place, not only for NEST Corporation but also specifically for each of its key service providers. These plans are reviewed at least once a year with the aim of ensuring that they remain fit for purpose.
Investment

The investment objectives for the scheme are set out in its Statement of investment principles (SIP). The Trustee is required to prepare this document under section 35 of the Pensions Act 1995. The SIP was reviewed in February 2018 and will be reviewed every three years and whenever there’s a change in the investment approach. The Members’ and Employers’ Panels are consulted prior to any changes to the SIP.

Based on NEST Corporation’s understanding of the diverse needs of NEST membership, NEST Corporation has developed an approach to investment that offers:

- a well-constructed default strategy that has clear return objectives and a carefully managed risk profile, called the NEST Retirement Date Funds
- a selection of clearly differentiated fund choices for those who have different risk appetites, investment objectives or want an approach that matches their beliefs or faith.

The day-to-day management of NEST members’ funds is performed by external fund managers. Each manager is authorised and regulated by the Financial Conduct Authority (FCA) or the regulatory body in the country within which the fund is domiciled. The funds and fund managers are selected through a competitive tender process. Professional advice from the Trustee’s in-house investment team and independent external investment advisers is obtained and considered in the selection of these funds and fund managers. As part of this selection, a due diligence process is performed to ensure that the assets are invested with sufficient security and liquidity. It also makes sure that each of the fund managers is of the appropriate quality and calibre to ensure the quality and profitability of the assets.

NEST Corporation receives annual AAF 01/06 or ISAE 3402 assurance reports from the fund administrator and all of the fund managers. It assesses the findings of these reports to check the adequacy of suppliers’ controls and to see that these controls are being effectively operated.

Administration

The administration of the scheme is outsourced to Tata Consultancy Services Limited (TCS or ‘the scheme administrator’). The scheme assurance team and the scheme administrator contract manager provide assurance to the Trustee, CEO and executive team that this relationship is continuing to work effectively. They do this on an ongoing basis.

The scheme administrator’s role includes managing employer participation, enrolling members, collecting contributions, managing accounts, passing funds to and from the fund administrator and managing retirement and death processes. Each of these processes is designed by the administrator and agreed by NEST Corporation. They’re based on a set of functional specifications established by NEST Corporation and underpinned by contractual requirements to ensure the service provided is in line with market best practice.

The Trustee recognises the primary importance of making sure contributions are paid on time. As a result, TCS and NEST Corporation have jointly devoted significant effort to developing processes and controls to ensure contributions are received in time. They’ve also been designed to make sure that appropriate action is taken in the event that contributions are late.

The scheme administrator provides detailed feedback to NEST Corporation on a monthly basis. This aims to provide adequate assurance that services are being provided in line with levels of service that members and participating employers deserve. The scheme administrator also provides the Trustee with an annual AAF 01/06 assurance report detailing the adequacy and operation of their internal control framework.
NEST Corporation IT services and information security

The work of NEST Corporation’s IT and information security teams aims to ensure that NEST Corporation and its outsourced providers operate in an efficient and secure IT environment. To support this aim, all NEST Corporation IT users are required to undertake information security training. This is supported by policies on data protection, information security and records management. NEST Corporation is certified against ISO 27001.

IT infrastructure is outsourced to an external IT service specialist. From November 2015, this has been Advanced 365, who are also certified against ISO 27001. Access to the NEST Corporation IT network is through a series of logical access controls, established by NEST Corporation and administered by the outsourced provider. This is regularly reviewed to help ensure that access rights are granted appropriately.

One of the contractual responsibilities of the IT service provider is to help ensure that NEST Corporation’s systems and data are backed up in accordance with the business continuity disaster recovery (BCDR) policy. Another is to put appropriate recovery time objectives in place to ensure that systems are operational following a disaster event. These arrangements are tested regularly.

Communications

NEST Corporation produces clear and concise communication materials for members and employers. Designed to be easy to understand and engaging, these communications are underpinned by NEST’s Golden rules of communication. This outlines eight principles for effective communications, such as using plain language and real life examples to bring communications to life. These have been incorporated into all our communications to help ensure they’re relevant to their audience.

For employers, there’s a suite of guidance on setting up and managing the scheme available on the NEST website, including the online help centre. There’s also a range of statutory communication templates employers can use to meet their duty to tell their workers about auto enrolment. A contact centre and live web chat facility are also available to deal with their queries.

Member communications are tailored to meet their needs at each stage of their journey to retirement. On joining the scheme, members receive a letter with a document called Your quick guide to NEST through the post. On logging into their secure mailbox, there’s a link to the PDF version of Welcome to NEST, which tells them the basics about saving with NEST. Among other things, this explains their investment choices and how their level of contributions is a key factor in determining the overall size of their pension pot. Each year we also send members information on their pension pot in their annual statement.

As members approach retirement, we send them information on the options available to them, starting from six months before their retirement date. The Taking your money out of NEST guide is reviewed each year to make sure it’s relevant and complies with legislative and regulatory disclosure requirements.

Information relating to NEST’s costs and charges is available on the public website for any audience at any time. This information is reviewed on an annual basis to make sure it remains accurate. It’s also reviewed to make sure it takes into account guidance on pension charges from the Pensions and Lifetime Savings Association.

Before a new communication is sent to an employer or member, it’s subject to the marketing and creative services quality assurance process (MACS-QA). This is designed to ensure that all our communications are consistent with specified brand guidelines and messaging, as well as legislative and regulatory requirements. NEST communications are reviewed for ongoing accuracy and completeness.
Assurance activity

Monitoring activity is carried out throughout NEST Corporation to demonstrate that the scheme is being operated in accordance with relevant legislative and regulatory requirements. This assures the Trustee, audit committee, CEO and executive team that NEST Corporation and its suppliers are managing the scheme effectively, with adequate controls in place.

NEST Corporation employs a line of defence model for monitoring and audit functions. The first line of defence monitoring is primarily undertaken by the scheme assurance and fund administration teams. Their activity is designed to ensure that the activities of outsourced providers are compliant with legislation, regulation and the terms of the outsourcing contracts.

The second line of defence comes from specialists within the risk, compliance and technology directorate, namely the assurance team comprising of specialists in compliance, financial crime prevention and information security. They provide assurance that the policies and processes within NEST Corporation are sufficient for the purposes of compliance with regulatory and legislative requirements.

The third line of defence is the internal audit functions. To help ensure absolute independence of internal audit activity of NEST Corporation and the scheme, this function is outsourced to Ernst and Young. External audit activities of NEST Corporation are conducted by the National Audit Office (NAO) and external audit of the scheme is conducted by KPMG. Both functions design and carry out an annual audit plan, reviewing the operation of NEST Corporation and the scheme, where appropriate. They also review the activities of the first and second lines of defence, to help ensure that they’re carrying out their activities competently and complianlty. Both internal and external auditors have unrestricted access to any aspect of the organisation. The heads of all second and third line functions also have unrestricted access to the CEO and chair of the audit committee.

Where second or third line monitoring identifies failings in process or practice, these are thoroughly evaluated. Action points are then agreed with the appropriate member of the executive team and assigned to a named individual to resolve. Each quarter, all monitoring and audit functions throughout NEST Corporation report findings of their investigations and escalate any issues to the audit committee. Actions assigned through monitoring or audit activity are tracked. Process owners who fail to complete actions in the timeframe set by the monitoring function have to provide an explanation to the audit committee. On a regular basis, second and third line of defence functions meet to review actions arising from their monitoring work and address any common themes identified.
Summary of control objectives

Set out below is a summary of the control objectives that the Trustee of NEST has identified as being relevant to the governance and administration in the operation of NEST. Section 5 of this report that follows describes the procedures and controls which are designed to meet these control objectives.

Value for members

Assessing value for members

1. A value for money assessment is undertaken annually and the process followed is documented and approved. The assessment should include value for members, derived from scheme management and governance, administration, investment governance and communications.

Management of costs and charges

2. Disclosure of information to members of costs and charges (rates (%) and amounts (£)) are complete and accurate.

Investment governance

Protection of assets

3. Scheme and member assets or entitlements are safeguarded from loss, misappropriation and unauthorised use. Financial protection and compensation available to members in the event of a default is assessed and documented.

4. The design and on-going suitability of the default arrangement and range and risk profile of other investment options are regularly reviewed and monitored. This review is documented, and the investment aims and objectives for the arrangement and investment policies for all investment options are included in an approved SIP.

5. The performance of each investment option, including the default arrangement(s) in which member funds are invested are regularly reviewed and monitored against objectives in the SIP. This review is documented and approved.

Trustee Board

6. Fitness and propriety requirements for trustees are recorded and managed in accordance with a policy which is regularly reviewed and approved. The fitness and propriety of trustees is reviewed prior to appointment and annually thereafter. This review is documented and approved.

Scheme management skills

7. Conflicts of interest are subject to ongoing monitoring and are identified, recorded and managed in accordance with a defined policy which is regularly reviewed and approved.

8. Trustee levels of knowledge and understanding are managed and maintained in accordance with an approved training and development plan. This plan is regularly reviewed and updated.

9. A business/resource plan is maintained, that sets out when scheme related activities are due to take place or be completed, and regularly reviewed to ensure that resources are available and allocated.

10. Roles, responsibilities and duties of all trustees, advisers and service providers are documented and the performance and quality of their service is subject to regular documented reviews. The suitability of advisers and service providers is reviewed against criteria before appointment and this review is documented.

11. Discontinuance plans, which address how member assets or entitlements are safeguarded in the event of the Master Trust or any key service provider failing, defaulting or transferring ownership, are documented, approved and maintained.

12. A risk management framework is established to identify, evaluate and treat scheme risks. Risks are recorded in a risk register which is reviewed at least annually.
### Administration

**Core financial transactions**

13. Core financial transactions are processed promptly and accurately.

14. Contributions are invested and allocated in accordance with member instructions or the requirements of the default arrangement.

15. Transaction errors are identified and rectified.

16. Cash is safeguarded and all payments are suitably authorised and controlled.

17. Late and inaccurate contributions are pursued and resolved.

**Business and disaster recovery**

18. Data and systems are backed up periodically and retained offsite and regularly tested for recoverability. Business and information systems recovery plans are documented, approved, tested and maintained.

19. The capacity of an administration system to take on new business is assessed, approved and regularly monitored.

20. New business take-ons are properly established in accordance with Master Trust’s rules and contractual arrangements.

---

### Data quality and security

21. Member data is complete and accurate and is subject to regular data evaluation.

22. Monitoring of operations implemented to support the security of data transmissions and measures implemented to mitigate the threat of malicious electronic attack are regularly reviewed and documented.

23. Physical and logical access to computer systems, and member and Master Trust records and data, is restricted to authorised persons.

24. IT equipment is maintained in a controlled environment and the maintenance and development of systems, applications and software is authorised, tested, approved and implemented.

### Communication and reporting

25. Retirements are managed in accordance with a documented process which is regularly reviewed and approved.

26. Member communications are accurate, clear and understandable and are produced in accordance with a communications plan. The plan is regularly reviewed and monitored.

27. Member communications contain information to support the decisions members need to make at retirement.
This report examines the existence, design and operation of the processes and procedures in place for the governance and administration of the scheme during the period 1 April 2017 to 31 March 2018.

The control descriptions have been drafted to be objective and factual. In accordance with best practice, they contain the level of detail required to enable them to be properly verified and tested, and therefore reveal:

- what the control is for
- who operates the control
- how the control is operated
- the frequency of the control
- how the control is evidenced
- the results of the reporting accountant’s testing
- the management response, if applicable.

These controls are then given context by detailed process descriptions, which show how the control fits into the overall operation of NEST Corporation.

The full version of this section in the report details in 82 pages, 187 key controls over 105 control procedures, spread across the 27 control objectives set out within the Master Trust assurance framework.

The conclusion from the reporting accountant’s testing of these controls is set out in the Reporting accountant’s report. In summary, we can confirm that the results of the detailed tests in the full version include three instances where the control had not operated in accordance with the approved process. These exceptions include one annual and two ad-hoc controls. Overall, the reporting accountant did not consider these testing exceptions to be of material significance or representative of a thematic gap in relation to the operational effectiveness of our controls. They were also satisfied with the management responses provided.

We believe that the work involved in preparing this statement serves the interest of our members, by giving them independent assurance through the reporting accountant’s testing of our control procedures.

We have again reviewed whether we should publish the full details of our key controls and procedures, which make up this section in the full report. We remain of the view that due to the increase in risk of financial crime or data breach, it is not appropriate to offer full disclosure. Making a judgement about the balance between this increase in risk and our core value of transparency, we conclude that publication is not in members’ interests.

The full report will be made available to The Pensions Regulator and the Department of Work and Pensions. Our Members’ and Employers’ Panels will again be briefed on the control structure and findings of the review.
Reporting accountants’ report

Scope
We have been engaged to render an Undertakings description of its governance and administration controls procedures and design and operation effectiveness throughout the period 1 April 2016 to 31 March 2017 as set out in appendix E of your report.

Trustee’s responsibilities
The Undertakings requirements of the Trustee’s responsibilities are set out on page 1 of this report. The control objectives stated in the description identify those control responsibilities will be made in the context of the Trustee’s accounts in accordance with the Financial Statement and Financial Reporting Act 2005. Such objectives are described in the description as set out in appendix E of this report.

Our responsibilities
We have no independence, based on the work carried out in relation to the financial statements of NEST as described in your report, that would affect our independence in accordance with the Financial Reporting Act 2005.

Methodology
We conducted our examination in accordance with International Standards on Auditing (ISAs) (UK) 800, Geneva Programmes. Other than the work carried out as part of the above mentioned examination, we did not have subject us to the control of or was subject to the control of or through any organisation or unit that was not subject to our control. Our independence in accordance with the Financial Reporting Act 2005.

Date of report
This report is made solely for the benefit of the Trustees, the members of NEST, and for the NEST’s statutory auditors. NEST’s auditors are not intended to be used by others unless they have been notified in writing by NEST.

Our report has been prepared on the basis that NEST is a charity with a defined benefit scheme that NEST is a charity with a defined benefit scheme. Our report must not be relied on in whole or in part or in any other document and should not be relied on in whole or in part or in any other document and should not be relied on in whole or in part or in any other document and should not be relied on in whole or in part.

To the best of our knowledge, at the date of our London, we have no interests that are directly relevant to our work or that could affect the outcome of our work.

Summary

Scope of work
Our work involved planning and performing procedures to satisfy ourselves about the basis of the description of the governance and administration controls procedures of NEST Trust and the design and operation of those controls, our knowledge of the Trustee’s responsibilities and our knowledge of the matters specified by the trustees.

We have examined the Trustee’s responsibilities listed in the description. In relation to the description, we designed procedures and performed tests to obtain evidence about the representation of the description of the governance and administration controls procedures of NEST Trust and the design and operation of those controls, our knowledge of the Trustee’s responsibilities and our knowledge of the matters specified by the trustees.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Internal controls
NEST’s description is designed to meet the common needs of a defined benefit scheme. The Board is responsible for the entity’s financial statements and its internal controls. The Board is also responsible for the preparation of the financial statements.

Our opinion is in terms of internal controls and the auditor’s report. NEST’s financial statements and the auditor’s report contain a basis for our report of the matters specified by the trustees.

Opinion
In our opinion, the description of the governance and administration controls procedures of NEST Trust and the design and operation of those controls, our knowledge of the Trustee’s responsibilities and our knowledge of the matters specified by the trustees is appropriate.
